WEIGHT 176g
BATTERY TYPE Internal Li-ion; 3-pin charger (USB adaptor £8)
BURN TIME 2 hours

Supernova Airstream £169

WE WERE IMPRESSED by the performance and functionality of the Airstream. The powerful central beam is rectangular, concentrating light on your half of the road. Combined with a weaker outer beam, this was the most effective pattern for road riding on test, letting us ride with confidence in the darkest conditions. The fins help funnel air past the high-power LED, keeping it cool. It has a quick and convenient O-ring attachment,

four continuous modes and one flashing, a battery indicator light and a double-click switch which stops the light coming on accidentally – though there’s a bit of a knack to it. It can be tilted up and down and side to side, too.
